Congressional Record Aug 19 2021 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Database Semantics Jul 30 2022 Database Semantics: Semantic Issues in Multimedia Systems reflects the state of the art of emerging research on the meaning of multimedia information, as presented during IFIP's Eighth Data Semantics Working Conference (DS-8), organized by its Working Group 2.6 on Databases, and held at Rotorua, New Zealand, in January 1999. DS-8 was planned as an active forum for researchers and practitioners focusing on those issues that involve the semantics of the information represented, stored, and manipulated by multimedia systems. Depending on the topic and state of research, issues may be covered either deeply theoretically or quite practically, or even both. These proceedings contain twenty-one papers carefully selected by an International Programme Committee and organized in six thematic areas: Video Data Modelling and Use; Image Databases; Applications of Multimedia Systems; Multimedia Modeling in General; Multimedia Information Retrieval; Semantics and Metadata. For almost every area, important topics and issues include: data modeling and query languages for media such as audio, video, and images; methodological aspects of multimedia database design; intelligent multimedia information retrieval; knowledge discovery and data mining in multimedia information; multimedia user interfaces. Three visionary keynote addresses, by famous experts Ramesh Jain, Hermann Maurer and Masao Sakauchi, set the stage for discussion and future directions for the field. The collection of papers that resulted now offers a glimpse of the excitement and enthusiasm from DS-8. Database Semantics: Semantic Issues in Multimedia Systems is suitable as a secondary text for a graduate-level course on database systems, multimedia systems, or information retrieval systems and as a reference for practitioners and researchers in industry.

Spomenik Monument Database Jan 24 2022 Spomenik - the Serbo-Croat/Slovenian word for monument - refers to the pioneering abstract memorials built in Josip Tito's Yugoslavia between the 1960s and the 1990s, marking the horror of occupation by Axis forces and the triumph of their defeat during World War II. Through these imaginative creations, a forward-looking socialist society, free of ethnic tensions, was envisaged. This publication brings together more than 80 examples of these stunning brutalist monuments. Each has been extensively photographed and researched by the author to make this book the most comprehensive survey available of this obscure and fascinating architectural phenomenon. A fold-out map on the reverse of the dust jacket shows the exact location of each spomenik using GPS coordinates.

War Monuments, Museums and Library Collections of 20th Century Conflicts Aug 31 2022 This unique state-by-state directory covers monuments, memorials, museums, markers, statues and library collections that relate to the veterans, weapons, vehicles, airplanes, victims or any other aspect of war in which the United States participated. While a site may have been created before 1900 (such as a fort), there must be some operational or historical tie to a twentieth century conflict to be included here. General collections, such as museums of aviation, are included if they house materials related to a twentieth century conflict. The coverage is so thorough that statues honoring veterans of the Civil War appear if veterans of later wars are on their rosters of honorees. Another example of the comprehensiveness of this compilation is in the inclusion of memorials to victims of war such as the Holocaust Museum in Houston, Texas. For each site, the following information is given: street address, phone number, website and email address (if applicable), days and hours of operation, admission fees, other necessary information, and a brief description of the site.

Cold War Frequencies Jun 16 2021 Published for the first time, the history of the CIA's clandestine short-wave radio broadcasts to Eastern Europe and the USSR during the early Cold War is covered in-depth. Chapters describe the "gray" broadcasting of Radio Free Europe and Radio Liberty in Munich; clandestine or "black" radio broadcasts from Radio Nacional de Espana in Madrid to Estonia, Latvia, Lithuania and Ukraine; transmissions to Bulgaria, Romania, Albania, Ukraine and the USSR from a secret site near Athens; and broadcasts to Byelorussia and Slovakia. Infiltrated behind the Iron Curtain through dangerous air drops and boat landings, CIA and other intelligence service agents faced counterespionage, kidnapping, assassination, arrest and imprisonment. Excerpts from broadcasts taken from monitoring reports of Eastern Europe intelligence agencies are included.
