Bossy Grump May 11 2021 You know that awkward moment when your lava-hot boss says "marry me?" Not for love. Not for real. Not without a mammoth payoff. Of course, this fortune comes with a ginormous snag—Ward Brandt. Call me bananas. I must be short of a full bushel rejecting Chicago's finest billionaire. Who knew he was my boss when he crashed my worst date ever? Oh, but he found out. He swore I wasn't fit for Brandt Ideas, chewed me up, and spat me back out. I vowed I'd prove him wrong—and sabotage a metric ton of his coffee. Then tragedy strikes, upending his limitless ego. Guess who needs an image makeover to shore up the family business. Big fat hell no. King Snarlypants has a peanut-sized heart and a chip on his shoulder bigger than a redwood. Find another sucker, Ward-hole. Even if I agreed, my shields are up. No magnetic kisses. Zero butterflies. Nix the blushing when everyone gushes over what a "perfect couple" we'd be. Then again...it's just ninety days and mama needs a windfall. What's one little white wedding lie with a bossy grump built like a god?

Whatever Happened to Tradition? Oct 28 2022 The West feels lost. Brexit, Trump, the coronavirus: we hurtle from one crisis to another, lacking definition, terrified that our best days are behind us. The central argument of this book is that we can only face the future with hope if we have a proper sense of tradition – political, social and religious. We ignore our past at our peril. The problem, argues Tim Stanley, is that the Western tradition is anti-tradition, that we have a habit of discarding old ways and old knowledge, leaving us uncertain how to act or, even, of who we really are. In this wide-ranging book, we see how tradition can be both beautiful and useful, from the deserts of Australia to the court of nineteenth-century Japan. Some of the concepts defended here are highly controversial in the modern West: authority, nostalgia, rejection of self and the hunt for spiritual transcendence. We'll even meet a tribe who dress up their dead relatives and invite them to tea. Stanley illustrates how apparently eccentric yet universal principles can nurture the individual from birth to death, plugging them into the wider community, and creating a bond between generations. He also demonstrates that tradition, far from being pretentious or rigid, survives through clever adaptation, that it can be surprisingly egalitarian. The good news, he argues, is that it can also be rebuilt. It's been done before. The process is fraught with danger, but the ultimate prize of rediscovering tradition is self-knowledge and freedom.

Redefining Anxiety Mar 09 2021 Anxiety is real—but it isn't the end of your story. Dr. John Delony knows what anxiety feels like. He's walked that dark road himself, but he found light and hope on the other side of it. Bringing together his own journey and two decades of counseling and research, he walks you through: The four biggest myths about anxiety and the life-changing truth Practical steps you can take today to start getting your life back Long-term strategies for healing to help you move forward John will show you that most of what you've heard about anxiety is wrong. Things like: If you have anxiety, you're broken and need to be fixed Anxiety is a disease that can only be cured with medicine Anxiety is caused by your genetics While mental health is complex, our culture has made anxiety into something it's not. For the majority of people who face anxiety, the truth is simpler than we think: anxiety is an alarm. It's a signal—nothing more and nothing less. Anxiety is simply our body's way of telling us something is wrong. If we stop and listen, we can calm the alarm and move forward into healing and hope.

13 Things That Don't Make Sense May 31 2020 Science starts to get interesting when things don't make sense. Even today there are experimental results that the most brilliant scientists can neither explain nor dismiss. In the past, similar anomalies have revolutionised our world: in the sixteenth century, a set of celestial irregularities led Copernicus to realise that the Earth goes around the sun and not the reverse. In 13 Things That Don't Make Sense Michael Brooks meets thirteen modern-day anomalies that may become tomorrow's breakthroughs. Is ninety six percent of the universe missing? If no study has ever been able to definitively show that the placebo effect works, why has it become a pillar of medical science? Was the 1977 signal from outer space a transmission

from an alien civilization? Spanning fields from chemistry to cosmology, psychology to physics, Michael Brooks thrillingly captures the excitement and controversy of the scientific unknown.

Strange Situation Mar 29 2020 How can we create strong attachments with our children and why does it matter? In this intimate, rigorous book, a mother investigates the often misunderstood science of attachment theory while navigating her relationships with her own daughter and mother. After Bethany Saltman gave birth to her daughter, Azalea, she began to feel that there was something 'off' about her experience of motherhood. She loved her daughter, but would often be angry, short on patience, even unkind. She worried that her own childhood had left her unable to properly bond. So she went on a journey to better understand herself, her daughter, and their relationship through the science of attachment. Saltman launched a broad inquiry into attachment theory, a field of developmental psychology that answers the question of why -- from an evolutionary point of view -- love exists between parents and children. Focusing on the data from a famous laboratory procedure, the 'Strange Situation', she discovered that love is unbreakable. Each and every one of us -- including her -- is built for it. In this deeply researched and enormously personal account, Saltman boldly asks science to answer to love, giving readers the tools with which to interpret and understand their own connections with others, and to have better, healthier relationships, whatever their situation.

Have and Stougaard Pedersen challenge the historical notion that audiobook listening is a compensatory activity or a second-rate reading experience, while seeking to establish a dialogue between sound studies and media studies, comparative literature, aesthetics, and sociology.

In three months Singapore, the impregnable fortress, knows the humiliation of surrender. Through the misery and despair of this bloody campaign Trewin and his captain are forced to draw on each other's beliefs and weaknesses, and together they weld the little gunboat into a symbol of bravery and pride.

Audiobooks, Literature, and Sound Studies Feb 20 2022 This is the first scholarly work to examine the cultural significance of the "talking book" since the invention of the phonograph in 1877, the earliest machine to enable the reproduction of the human voice. Recent advances in sound technology make this an opportune moment to reflect on the evolution of our reading practices since this remarkable invention. Some questions addressed by the collection include: How does auditory literature adapt printed texts? What skills in close listening are necessary for its reception? What are the social consequences of new listening technologies? In sum, the essays gathered together by this collection explore the extent to which the audiobook enables us not just to hear literature but to hear it in new ways. Bringing together a set of reflections on the enrichments and impoverishments of the reading experience brought about by developments in sound technology, this collection spans the earliest adaptations of printed texts into sound by Charles Dickens, Thomas Hardy, and other novelists from the late nineteenth century to recordings by contemporary figures such as Toni Morrison and Barack Obama at the turn of the twenty-first century. As the voices gathered here suggest, it is time to give a hearing to one of the most talked about new media of the past century.
