Users' Guides to the Medical Literature Oct 29 2019 The #1 guide to the principles and clinical applications of evidence-based medicine has just gotten better! A Doody's Core Title ESSENTIAL PURCHASE for 2011! No other resource helps you to put key evidence-based medicine protocols into daily clinical practice better than Users' Guides to the Medical Literature. An instant classic in its first edition, this detailed, yet highly readable reference demystifies the statistical, analytical, and clinical principles of evidence-based medicine, giving you a hands-on, practical resource that no other text can match. Here, you'll learn how to distinguish solid medical evidence from poor medical evidence, devise the best search strategies for each clinical question, critically appraise the medical literature, and optimally tailor evidence-based medicine for each patient. The new second edition of this landmark resource is now completely revised and refreshed throughout, with expanded coverage of both basic and advanced issues in using evidence-based medicine in clinical practice. FEATURES: Completely revised and updated to reflect the enormous expansion in medical research and evidence-based resources since the first edition Innovative organization guides you from the fundamentals of using the medical literature to the more advanced strategies and skills for use in every day patient care situations Abundant and current real-world examples drawn from the medical literature are woven throughout, and include important related principles and pitfalls in using medical literature in patient care decisions Practical focus on the key issues in evidence-based practice: What are the results? Are the results valid? How to I apply to results to the care of my patients? More than 60 internationally recognized editors and contributors from the U.S., Canada, South America, Europe, and Asia -- the best of the best in the discipline NEW coverage on how to: --Avoid being misled by biased presentations of research findings --Interpret the significance of clinical trials that are discontinued early --Influence clinician behavior to improve patient care --Apply key strategies for teaching evidence-based medicine Also look for JAMAevidence.com, a new interactive database for the best practice of evidence based medicine.

Reproductively Active Chemicals Dec 12 2020 Reproductively Active Chemicals A Reference Guide Richard J. Lewis, Sr. Adverse effects on the human reproductive system due to chemical exposure are a growing concern of occupational safety and health professionals. While the effects of certain chemicals can be difficult to detect, and often go unnoticed or are mistakenly attributed to other causes, they can drastically increase risks of infertility, sterility, birth defects, and post-birth complications. Written by one of the foremost authorities in the field today, Reproductively Active Chemicals is the first book to identify, compile, and fully document the effects of more than 3,300 chemical substances known or suspected to cause adverse effects on human reproductive health. This major reference work features: Cross-indexes by synonym and identification number Vital information drawn from authoritative sources on hazardous chemicals, including chemical properties, toxicity, and synonyms Toxic effects indicating reported dominant reproductive effects The list of reproductively active materials covered here includes drugs, food additives, preservatives, ores, pesticides, dyes, and many other classes of materials. Some of the information also refers to materials of undefined composition. For each entry, the author provides the "DPIM" number, entry name, CAS number, molecular formula, molecular weight, a description of the material, and physical properties. He specifies effects on the male and female reproductive systems, mating success, fetal effects including abortion and transplacental carcinogenesis, and post-birth effects. Each reproductive or teratogenic effect reported includes the dose and species exposed, a brief characterization of the exposure conditions, and a reference to the source of the data. Human effects are presented separately from animal data to highlight the data's importance. With its broad range of crucial, up-to-date information, Reproductively Active Chemicals is an essential sourcebook for professionals in industrial health and safety and related areas. It offers vital information for protecting current and future generations from the dangers of chemical exposure, and will be especially helpful to industrial hygienists and toxicologists, safety and risk managers, loss prevention personnel, and industrial insurers.

Handbook of Environmental Economics Jul 27 2019 Much applied environmental economics is concerned with the valuation of changes in environmental quality. Obtaining reliable valuation estimates requires attention to theoretical and econometric issues that are often quite subtle. Volume 2 of the Handbook of Environmental Economics presents both the theory and the practice of environmental valuation. It synthesizes the vast literature that has accumulated since the publication of the Handbook of Natural Resource and Energy Economics two decades ago. It includes chapters on individual valuation methods written by researchers responsible for fundamental advances in those methods. It also includes cross-cutting chapters that deal with aspects of welfare theory, uncertainty, experimental methods, and public health that are pertinent to valuation. Throughout the volume, attention is paid to research and policy issues that arise not only in high-income countries, where most of the theory and econometrics that underlie applied valuation methods have been developed, but also in poorer parts of the world. The volume provides a state-of-the-art reference for scholars and practitioners alike.
ACARS - A Users Guide Dec 24 2021 Aircraft Communications Addressing and Reporting System (ACARS) is a digital datalink system for transmission of short,and relatively simple messages between aircraft and ground stations using the airband VHF radio link. The message protocol was designed by Aeronautical Radio Incorporated (ARINC) to replace their VHF voice service and deployed in 1978 using telex type format. SITA, a multinational information technology company, later augmented their worldwide data network by adding ground radio stations to provide ACARS service.
