Russian Motor Vehicles Dec 12 2020 A book concerning Russian Limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, late the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid during the late 1950s. Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject.

Working for the Japanese Oct 29 2019 This book is an exploration into the relations between Americans and Japanese at the Mazda-Flat Rock plant. The presence of Japan Inc. looms larger than ever for millions of American managers and workers, as hundreds of Japanese companies open plants and offices in local communities across the United States. What is it like to work for the Japanese? Can Americans, with their strong tradition of individualism, adjust to a Japanese "team system" that emphasizes harmony and close cooperation? How do Americans and Japanese resolve the misunderstandings that arise from differences in language and culture? Journalists Joseph and

Suzy Fucini sought the answers by studying relations between Americans and Japanese at the Mazda plant in Flat Rock, Michigan, the first wholly-owned Japanese auto plant to employ a unionized American workforce. For three years, the Fucinis followed events at the plant, interviewing more than one hundred workers, managers and outside suppliers. The authors conclude that for all its strengths, the team system requires the sacrifice of individual interests to the good of the group, and that no matter how hard an individual tries to become part of the Mazda team, advancement for both managers and workers will be limited by the fact that they are not Japanese.

BRM V16 Jul 27 2019 There was a vast difference between the BRM and any other car I'd yet driven. When I opened the throttle, even at high speeds in top gear, the whole thing shuddered with a frightening surge of power. It could spin its wheels effortlessly at speeds equal to many other cars' maximum. It was doing 187 on the straight at Monza, which was too quick for a car that didn't handle. If you let the revs drop much below 9000 the car just wouldn't go at all." Sir Stirling Moss.
