[The French Army and Its African Soldiers](#) Jun 25 2022 As part of France's opposition to the independence of its former colonies in the years following World War II, its army remained deeply invested in preventing the decolonization of the territories comprising French West Africa (FWA). Even as late as the 1950s, the French Army clung to the hope that it was possible to retain FWA as a colony, believing that its relations with African soldiers could offer the perfect model for continued ties between France and its West African territories. In *The French Army and Its African Soldiers* Ruth Ginio examines the French Army's attempts to win the hearts and souls of the local population at a time of turbulence and uncertainty regarding future relations between the colonizer and colony. Through the prism of the army's relationship with its African soldiers, Ginio considers how the army's activities and political position during FWA's decolonization laid the foundation for France's continued active presence in some of these territories after independence. This project is the first thorough examination of the French Army's involvement in West Africa before independence and provides the essential historical background to understanding France's complex postcolonial military relations with its former territories in Africa.

[Predicting Marina Slip Renter Trip Spending at US Army Corps of Engineers Lakes](#) Nov 06 2020 This study summarizes party-day and party-trip spending profiles for boaters from Corps of Engineers marinas at three lakes: Harry S. Truman, Missouri; Lake Sidney Lanier, Georgia; and Raystown Lake, Pennsylvania. Visitor spending by marina slip renters across the lakes was measured and predictive models of spendings were developed. Least squares regression models were developed for party-day and party-trip spending estimates within 30 miles of the lake.

Army Relations with Congress Aug 27 2022 Relying on extensive candid interviews from members of Congress and staff on defense authorization committees and senior Army general officers, Scroggs provides an insider analysis identifying problematic patterned Army-Hill behavior and its cultural impediments. He concludes with recommendations on how the Army can become a more effective voice for its own interests and national security.

Dust Off: Army Aeromedical Evacuation in Vietnam Jun 01 2020 Drawing on its first experiments with helicopters in Korea, the Army in Vietnam came to rely almost entirely on the helicopter for medical evacuation. The Dust Off and Medevac helicopter ambulance units tested and perfected for medical use the Army's new helicopter, the UH-1 ("Huey" Iroquois), and developed several new devices that helped save thousands of American lives between 1962 and 1973. The pilots of these helicopters displayed courage and devotion to duty that earned widespread respect from soldiers. This book explains early problems of medevac in Vietnam, recounts the valor of crews, and describes the movement of patients to in-theater Army hospitals. It also shows the effect that helicopters had on traditional procedures. The widespread use of the helicopter for medical evacuation in America since the Vietnam War testifies to the broader issues raised by this study, and of the relevance of Army history to the civilian community.
